

G-MAX TITAN[®] PLATFORMS

The 1" G-Max Titan Portable Platforms are manufactured from a proprietary blend of Thermoplastic Resins, SBR Rubber and UV Stabilized Pigments blended to create the look of Real Wood with the durability and performance of rubber. These are the exact same G-Max Platforms that have been installed in some of the top athletic facilities across the country over the past 10 years. Now available in a portable, stand-alone version.

Features

- **PORTABLE:** easily carried or moved
- Available in 4' deep and 6' deep platforms
- Extremely Durable
- Will not dent like traditional wood
- Similar feel and traction as wood platforms
- Made from Super High Density SBR Rubber
- Shipped in Synthetic wood (as shown)
- Attaches to floor with removable, double-sided tape
- Custom Logos available for Sports Teams with multiple platform orders. Logos created in Exact Pantone Colors.
- Ships in 3 separate sections
